DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 4 – 9, 15, 16, and 25 – 31, drawn to a semiconductor device, classified in class 257, subclass 758.
 - II. Claims 33, 35, 36, 42, 46 – 54, drawn to a circuit and a method of operating a circuit, classified in class 365, subclass 63.
 - III. Claims 37 – 41 and 44, drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 622.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the particular device limitation of a first, second, and third layers of metalization where the layers include an I/O line that is continuous over a span of two or more memory blocks. The subcombination has separate utility such as a memory circuit with a sense amplifier.
3. Inventions III and I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as

claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the products can be made by a materially different process such as forming the transistors which share a common source instead of the common drain of group I or forming an coupling the peripheral circuitry with a line other than a damascene line such as a deposited and etched line.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian Wilson whose telephone number is (571) 272-1886.

The examiner can normally be reached on weekdays, 7:30 AM to 4 PM.
